Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Discussed the claim limitations in light of the applied prior art. It was agreed that if the claim language of all independent claims describes the method or system or program instructions to be for "training a computer system to recognize a specific action of a user and associate the specific action with a computer event" and to comprise of capturing an image of a user within a first predetermined "window" instead of "target area", the claims would better describe the invention as well as overcome the applied prior art.
